REPAIRS AND ADJUSTMENTS: No repairs or adjustments

NOTE: The performance figures on this report are the result of replacing the electronic engine control module of the Fendt 926 with the 920 module.

REMARKS: All test results were determined from observed data obtained in accordance with official OECD test procedures. This tractor did not meet the manufacturer's claims of 40% torque rise, 6% power bulge, 3 point lift at ball ends of 20238 lb (90 kN) nor remote hydraulic flow of 30 gpm (112 l/min). The performance results on this summary were taken from OECD tests conducted under the Code II Test Code procedure.

We, the undersigned, certify that this is a true summary of data from OECD Report No. **2064**, Nebraska Summary 389, June 11, 2003.
